## Checklist

Order checklist for a Buschfeld Sense System, 48 Volt with lighting control.

- 1 Track structure**  
 Determine the fastening and the course of the lighting tracks. System combinations are possible, 3-dimensional tracks, arch elements, as well as T-, cross and star connectors can be used.

Top view or side view: With a sketch, you help us to better understand your lighting concept. Step by step we can clarify open questions together and get a good overview.

Note: track standard length is 2000 mm; Shortenings are possible on-site or on order.

- 2 Track colour / surface**  
 Standard colors: alumatt, black, white, bronze  
 Special colors are available on request.

- 3 Power feed (48 V)**  
 For the power supply with 48 volts, we offer different possibilities of feeding: In a long track or a small separate component. The specific choice of power supply is necessary if your planning provides for a equipment that is not installed directly on the track.

You can find more information on our website. Click on the links.

Concept behind the walls track: Wall48 (Info / How it works)

Pendant tracks: Pend48 (Info / How it works)

Freestyler (product selection)

Ceiling tracks: Ceiling48 (Info / How it works)

Recessed tracks: In48 (Info / How it works)

Chandelier Rondo48 (Info / How it works)

Freeforms

Individual luminous object / eg. Birds' flight

Standard- and customized colours (Info / How it works)

Power feeds (sample selection)
